SECTION 5: Firefighting measures

5.1. Extinguishing media
Suitable extinguishing media: Water spray.

5.2. Special hazards arising from the substance or mixture
The ignition temperature of this material in air is approximately 900 °C. If ignited, flames may not be visible in the burning powder. Some heat and smoke may be noticeable.

5.3. Advice for firefighters
Protection during firefighting: Firefighters should wear full protective gear. If possible, isolate the burning powder into an open area (preferably outside), monitor, and allow the fire to burn itself out. Gently applying a fine water mist to the area of the fire may be helpful. Stop spraying if water starts to puddle. Eliminating the source of oxygen may also be helpful. DO NOT spray with high pressure fire extinguishers.

Methods for cleaning up: Shovel or sweep up and put in a closed container for disposal.

6.4. Reference to other sections
No additional information available

SECTION 7: Handling and storage

7.1. Precautions for safe handling
Precautions for safe handling: Avoid dust exposures above the occcuational exposure limits. Wash exposed skin daily. Fine dust may cause electrical shorts and is capable of penetrating electrical equipment unless tightly sealed. If hot work (welding, torch cutting, etc.) is required the immediate work area must be cleared of carbon black product and dust.
