

ThixoCal™ 5752A

Formulated Rust and Corrosion Preventive Compound

Description

ThixoCal™ 5752A is a specially formulated corrosion preventive compound with enhanced penetrating characteristics. ThixoCal™ 5752A is comprised of gelled calcium sulfonate, waxes, oils, and other special ingredients in a mineral spirits carrier. This product offers excellent underbody protection to vehicles exposed to highway deicing salts. This easily pigmented product will provide somewhat tacky films with excellent salt spray protection. ThixoCal™ 5752A is a general rust proofing compound that may be used for both underbody and inner panel cavity protection. This product is also an excellent choice for temporary or long-term protection of metal parts and tubular goods during transit and indoor/ outdoor storage.

ThixoCal™ 5752A is also a good choice for temporary or prolonged protection of metal goods including premium applications such as protection of railroad equipment and electronic communications equipment including support vehicles and structures.
